

## Lynnsey Patterson

Please do not allow oil field waste to be dumped into boysen reservoir, the wind river, and big horn river. These are highly visited areas for fishing and recreation. This can poison both citizens and wildlife.

Adittinally, it will put a stain on Wyomings image. We're supposed to have clean water, good fishing, and thriving wildlife.

Don't ruin Wyoming. Whatever money the state gets from this will never replace the priceless gifts this area has given us and continues to give us.
