

## Gordon Townsend

I am 100% against the disposal of oil field waste water into the surface waters of Wyoming. In this instance, I'm commenting on the proposal of discharging pollution into Boysen Reservoir. I fish boysen and I'm concerned about polluting the flesh of fish that I consume from these waters. In addition, I wouldn't want to drink the water, no matter how much it's diluted. The nation isn't in that much need of oil that we disregard the health of our residents, wildlife and fisheries.
