

sarah krall

I have already sent one letter to you. I can not believe I still have to fight against and try to politely oppose this mad idea. Stop fracking water from being dumped into Boysen Reservoir. !! Please. Please. Use commonsense (common sense) and good old "look yourself in the mirror" integrity and do not allow this to happen to Boysen, the Wind river, the Bighorn river and everything and everyone else down stream. Money today is NOT WORTH degradation and filth tomorrow. Imagine you have children and grandchildren. Consider them if you do.
