

Stephanie White

Although I do not reside in Wyoming I was a long time resident in lander and our family still has businesses in Casper, Gillet and Laramie and my uncle lives on his ranch in Saratoga . I still return to Wyoming every year and I have spent many hours and days sailing, swimming and enjoying Boysen as well as fly fishing in wind River Canyon and enjoying the area. I have a great concern for the contamination of such a wonderful resource that is home to wildlife and Wyoming destinations for summer activities. Allowing big business such as oil fields to dump their overflow and waste into Boysen would not only damage our ecosystem but will also put an end to an area that is used for recreation. Please Do not issue a permit for the dumping of anything but natural fresh clean Mountain water into Boysen.
