I wish I were articulate enough to express my dismay. Department of Environmental Quality? I do understand I'm not to be negative, but should be respectful. I worry many Wyoming government officials do not look forward to a time when our magnificent natural wonders and resources remain healthy and truly magnificent. I find want to say something crude like Department of Environmental Degradation. Money today is not a fair trade for the belittling degradation of such grand places as Boysen, the Wind River, the Bighorn. You are not requiring Aethon disclose the chemicals they use? You are not following guidelines or even the hopes and mission of the Clean Water Act? Folks can get grandfathered in and be "excused" ? I do not understand how you can even begin to agree this is a fine and wonderful way for a corporation to take advantage of Wyoming. I can not even imagine how you will look yourself in the mirror each morning knowing what you may approve. Please, think about the future, not today's power and money. Gick. Gick to this idea and plan. I have a terrible taste in my mouth about this and am unable to spit it out.
