

Jean Harris

Water is our most precious resource. We are made of water, everything on this earth requires clean water to thrive. Including, YOU, who wish to pollute our water system. This is within the boundaries of the Wind River Indian Reservation, to which the Eastern Shoshone Tribe holds the original 1868 Treaty rights. Should you violate this treaty, and ignore the voice of the Eastern Shoshone General Council-which is our governing and supreme deciding party- you can and will face a lawsuit. There have been precedented laws recently which uphold the rights of Tribal Government, their respective treaties, AND protect our resources. Silence is not golden in this case, nor will it be swept under the rug. As tribal people we respect the Earth and its resources and are prepared to bring forth a lawsuit should this pollution go forth!
