

Jonathan Malutich

Aethon Energy's request to discharge wastewater from its Moneta Divide oil and gas field into creeks and streams that flow into Boysen Reservoir is an outrage! DEQ needs to protect Wyoming waters from pollution and prohibit Aethon from dumping its untreated and partially treated oil and gas field wastewater into Boysen Reservoir.

The Wyoming Environmental Quality Council has designated the Wind River as a Class 1 river, yet DEQ is considering to permit wastewater discharge that would degrade this river.

Please deny Aethon's permit.

Sincerely,

Jonathan Malutich
