

Felicia Alvarez

Why would you deliberately poison fresh water - Wyoming may be vast in open space. This waste contamination will impact not only the environment, but animal habitats, water habitats, any human consumption this water way may feed. Not to mention the treaty violations concerning water ways going through Fort Bridger Treaty lands. Why is the state of Wyoming so greedy to get oil and not even think about how the waste will impact everything living. There is nothing safe about this. I want to know if they have had consultations with the Eastern Shoshone tribe about the environmental impacts of this water that will flow through Fort Bridger treaty Lands.
