

Nate Lewis

I was born in Wyoming and grew up in Fremont County. Oil and gas supported my family, and countless others for decades. Its industry creates jobs and other supporting industries and businesses - wherever it exists, that help the surrounding area as a whole.

I now reside in Colorado and have nearly 20 years experience in the oil and gas business.

The industry has changed in many positive ways. New technology is continuously being developed and utilized to provide a better culture, safer work practices, safer for the environment, and bring many economical efficiencies.

I know for a fact that natural resources can be developed and produced, and not only benefit, but improve the the environment. The industry creates a thriving economy that supports itself.

I move to proceed with this process. I am comfortable and trust the checks and balances of the industry to continue do the right thing for the environment and the economy.
