Department of Environmental Quality  
MAY 28 2019  
Water Quality Division

I object to DEQ's proposal to allow Aethon Energy to discharge more than 8 million gallons per day of oil and gas wastewater into Boysen Reservoir. It is time for DEQ to protect Wyoming's citizens, Wyoming's water, and Wyoming's environment rather than to kowtow to the energy sector.

The contaminated wastewater will contain hazardous fracking chemicals and will also allow Aethon Energy to dispose more than 2100 tons of dissolved solids - including 719 tons of chloride - into Boysen Reservoir each month.

Sincerely,  
Bill ~~Wright~~
