

Alex Lovell

The recreational opportunities that may be in jeopardy/lost should this permit proposal pass is far too irresponsible. The beauty in Boysen Reservoir, alongside the Big Horn and Wind River's in my opinion, are part of what makes Wyoming such a treat to both tourists and the state's residents. These rivers, known nationwide by anglers such as myself would be devastated if this proposal were to pass with ease. I urge the DEQ to consider comments such as mine, and for Aethon to consider redrafting their proposal if dumping their wastewater into these watersheds is necessary.
