

Jonathan Bittleston

This cannot be allowed! The threat of harming our ecosystem in Wyoming by allowing an oil company to dispose of their waste without any concerns for the repercussions of our state and wildlife is outrageous! As we all stand in this country we are losing more and more of natural habitat due to populations and matters not uncommon to this. I know as myself as an individual and many others on this great state of Wyoming we will not stand for this absurd "solution" from this company's need to dispose of their wastewater. We as a state and community here in Wyoming cannot let this happen. Please let the voices of Wyoming be heard on this matter as this is where we call home. We must think of the impacts it can have for generations after us.
