

Georgie Stanley

I don't understand how this could be happening. You are the Department of Environmental Quality and you are proposing to pump polluted water into our water shed. What are you thinking and how is this possible?

Please do not degrade the water quality in the creeks, Boysen Reservoir, the Wind River and the Bighorn River. I believe the right thing to do is to clean up the water and then pump it to Boysen at a reasonable temperature for the fish and other organisms.

Sincerely, Georgie Stanley
