

Wyoming Energy Families

Heidi Anesi

Wyoming is a boom and bust state that means our economy depends on this now more then ever especially with the mines shutting down. If we don't get this project rolling a lot more families will be leaving our state and then our economy will be hurting more then ever and I highly doubt that what anybody wants. I hate to say it but anybody against these rigs doesn't belong in Wyoming or they need to do more research on the economy or maybe they need to do the research of the benefits of the oil and gas nature. Without oil and gas we wouldn't have food, clothes on our backs and we'd still be a caveman and walking from place to

place.
