

Mark Slack

I have worked in the Oil & Gas Industry in the state of Wyoming for over 35 years, I was also involved in the construction of the "Hendry Water Facility" that Aethon/Encana have at the Frenchie Draw Field. They have spent thousands of dollars (Over & Above) to protect Wyoming's Water and environment. Fremont County alone is in a great loss for jobs. Businesses have already closed their doors do to the loss of customers (families moving out of Fremont County) and the state of Wyoming to find jobs else where. We Need These Jobs that the Oil & Gas Industry will provide our community in order to survive here. PLEASE GIVE THEM THE PERMITS!
