As a citizen of Hot Springs County, Wyoming, I do NOT support the revised second draft, but do support the initial draft proposal WYPDES permit WY0002062, allowing Aethon to expand its operation, hiring additional personnel, helping improve our economy, and positively impacting my family.

I encourage the Wyoming Department of Environmental Quality to approve the initial draft of the Aethon (Moneta Divide) Proposed Discharge Permit and manage the discharge within acceptable limits for the benefit of my family and all Wyoming citizens.

Furthermore, If the WDEQ put in regulation that make it imposable for Aethon Energy to operate, then they make it imposable for all oil and gas companies to operate in the state of Wyoming. Every oil and gas field discharges water, are they trying to single handily trying to bankrupt the state, and send 80% of its population on to welfare?
