RE: WYPDES Permit No.WY0002062, Comments to Revised Draft Permit

Dear Mr. Thomas:

As citizens of Hot Springs County, Wyoming, we DO NOT support the revised second draft but rather we DO SUPPORT the initial draft proposal WYPDES permit WY0002062, allowing Aethon to expand its operation, hiring additional personnel, helping to improve our economy, and positively impacting our family.

We live along the Big Horn River and irrigate 50 acres of cropland with this water. We haul potable water from Thermopolis to replenish cisterns on our property. We fully understand the layers of protections that exist in the permitting of these discharges and acknowledge that unregulated pollutants far exceed any contribution that Aethon's regulated activities will ever contribute. WDEQ must not let ill-informed citizens stop the ability for businesses to contribute to our State's livelihood. Permitting these discharges is not at the expenses of the environment. Our state simply cannot allow a fear driven agenda stifle ability to responsibly produce energy in our state.

I encourage the Wyoming Department of Environmental Quality to approve the initial draft of the Aethon (Moneta Divide) Proposed Discharge Permit and manage the discharge within acceptable limits for the benefit of my family and all Wyoming citizens.

Sincerely

Wedgwood & Katherine Taylor
