

# Jay Nielson

Wyoming DEQ should not even consider this permit until Aethon cleans up current pollution they caused. Wy DEQ should recognize the obvious that if millions of gallons of polluted water is discharged it will increase water pollution in Boysen and the Windriver - come on man do your job! If Bebout continues to strong arm Wy DEQ, turn the whistle blowers loose and expose him for what he is, a self serving lobbyist who's real constituents are Texas big money.
