

Savannah Salisbury

It is unfair that the DEQ changed the rules in the middle of the game by rejecting Aethon's permit and adding new regulations and restrictions. The DEQ owes it to the the many citizens who showed up and supported the research and permit at the public meetings. By allowing letters from those outside of the effected community to override the public support of the permit, it takes away the credibility of the DEQ. Not only was the public support ignored but the public was not given sufficient time or avenue to have their voices heard. Any out of county or out of state comments should also be disregarded
