

Tyler Watson

It is amazing to me that during a time when Wyoming is struggling financially we are going to put stricter guidelines on the companies that bring so much money to our economy. Wyoming has been about Oil and Gas forever, and it still has an abundance of it to provide!! As a state we cannot and should not be looking for ways to scare business away but instead be finding ways to keep them here. I strongly urge you as a lifelong resident and one who hopes to stay here, please rethink the regulations imposed on the Moneta Divide project.
