

Kevin Mahaffey

Any dumping of spent fracking water is an outrage. I'm a Wyoming native of 60 years. I've seen first hand what the oil and gas industry has done to my home state. Now with a insane money hungry crooked president our country's fair game for companies that are just as bad. It would be nice to know the people who made this possible and how much their bank accounts have increased. I can't imagine selling out my home states beauty.
