

susan goetzing

I am a lifelong, 58 year resident of Riverton. I grew up enjoying all of the recreational activities afforded by having Boysen reservoir so close to us. Numerous hours and many, many fond memories of the time spent there. I also have experienced the appropriate balance of regulation of development and preservation of this wonderful asset. However, I am stunned by the stance of the DEQ on imposing additional, unnecessary, restrictions on the Atheon permit. There operations have been in existence for decades with no issues, and for some reason (shall we assume political?) they are being forced to address these additional requirements. I am still in full support of the proposal that was discussed in the public meetings last year as with all of the monitoring that can be done, the additional permits should have been granted. I am also emphatically requesting the DEQ immediately reverse the additional restrictions being placed on their present permit.
