

## David Adams

To whom it may concern, I am upset with the rule changes in midstream. My family and friends depends upon oil and gas to make a living. Where the Moneta Divide area is there will be no damage to the environment if they meet the guidelines previously set forth. How much damage has been done by agriculture in the state? Why not set the same rules for everyone. How much salt is getting in the soil and waterways in Wyoming from salting the roads? Lets be real and allow the project to start. it will mean jobs and pay for schools, roads etc.
