

## Jamie Short

Dumping toxic waste in freshwater streams is immoral and damaging to all Wyoming citizens who rely on this water for drinking, agriculture and recreation. You are dangerous to the health of this state. You should be ashamed of this idea and ashamed of the actions you are already doing. How dare you risk the health of the people of this great state just to earn a profit. I do not support your actions and I do not support your proposal. I am a citizen born and raised, my voice matters. I do not give my permission for your permit.
