

Juan Laden

Hello,

I want you to further restrict the pollution of Alkali and Badwater Creeks with water from the Aethon drilling projects. There seems to be a lot of bad attitude about smaller waterways out in the "desert" as if they have no value and so why not just dump a bunch of salty water into them? I spend time out in that country as an artist, fine art photographer and I also just generally love the "desert", Sonoran Semi-arid areas. Fossil fuels are a thing of the past with the demand that we strongly advance our transition to sustainable energy sources and also learn to stop our high demand for energy, so we need to stop these effects on our natural world.

Sincerely, Juan Laden
