

James Hinkle

To Whom This May Concern at Wyoming DEQ:

Please reconsider your decision to disallow the expansion of the Moneta Divide Project and the reportedly increased regulation of the management of the discharged water from the existing gas extraction activities. It seems as if the decision of the DEQ has recently been significantly affected by the complaints of groups and individuals not based on science, but rather on fear tactics and inaccurate information. This decision has severe economic implications for the residents of Fremont County and Wyoming and will likely have long lasting effects on the oil and gas industry, which supports our schools, roads, infrastructure, and government operations.

Sincerely,

James Hinkle
Riverton, WY
