

Bonnie Long

Thank you for listening to the citizens of Wyoming regarding the new permit and not allowing more waste water to be dumped into Boysen. We should require Aethon to clean up existing damage to Badwater and Alkali creeks that has resulted from decades of dumping of toxic waste water before it is too late.

They should Immediately reduce the amount of dissolved salts that can be discharged
Reduce allowed chloride concentrations in Badwater Creek immediately (instead of waiting four more years, as the new draft permit proposes)

Add limits and required testing for other volatile and dangerous oil and gas drilling waste products including benzene, toluene, ethylbenzene, and xylene

Implement strong and prompt enforcement actions when violations occur. Thank you again for your continued efforts to protect our water and environment so important to our wildlife and the citizens of Wyoming!

Sincerely,
Bonnie Long
