

Becca Brown

You might wonder why I have an opinion: Because Wyoming is one of the most beautiful unspoiled places in the nation, and many of us love it even if we don't live there! Thank you for hearing our concerns and please consider these steps:

- Work with Aethon to clean up the existing damage caused by decades of oil field pollution in these streams;
- Immediately reduce the monthly load of salts currently authorized in both the existing and proposed discharge permit;
- Implement a one or two-year compliance schedule to achieve significant reductions in the concentration of chloride allowed in Badwater Creek. The DEQ's proposal to allow Aethon four more years to achieve full compliance with chloride standards is just too long;
- Deny any future requests to weaken the regulatory chloride standard currently applicable to Badwater Creek.

I have a 2-year-old granddaughter. I want to be able to show her my Wyoming in the future. Please help preserve its beauty!

Sincerely,

Becca Brown
