

Randall Kusel

Hindering of a company that will help our local fremont county economy crawl out of the slump it's in is simply asinine. Produced water has been discharged into the waters that lead to boysen for decades from many fields. I feel there are far worse things going into the water ways. Take Agriculture run off for example. That's why ocean lake has very minimal vegetation compared to 40 years ago. Any ways my point is simple. They are not requesting something new just a permit to up the volume.
