Cheyenne, WY 82002

**RE: LETTER OF SUPPORT
WYOMING SOLID WASTE RULES AND REGULATIONS
CHAPTER 4 AND CHAPTER 6**

Dear Ms. Lally:

The Wyoming Solid Waste and Recycling Association (WSWRA) membership consists of individuals, solid waste facility operators, engineers, mayors, county commissioners, and sales representatives from around Wyoming. WSWRA's mission is as follows:

"The Wyoming Solid Waste and Recycling Association is dedicated to the advancement of knowledge in the planning, operation and management of solid waste and recycling systems within the state of Wyoming, to protect the health and well-being of Wyoming's residents and resources."

WSWRA monitors rulemaking that affects our membership as the need arises. WSWRA has reviewed the proposed changes to the Chapter 4 Construction and Demolition Landfill Regulations, and Chapter 6 Transfer, Treatment, and Storage Facility Regulations of the Wyoming Solid Waste Rules and Regulations. We find the proposed rules meet the state statutory requirements set forth in W.S. §16-3-103(a)(i)(G) while consolidating and streamlining permitting for construction/demolition waste landfills and solid waste transfer, treatment, and storage facilities owned and operated by WSWRA's members. WSWRA is in support of the proposed Chapter 4 and Chapter 6 rule changes filed on November 28, 2018 with the Wyoming Environmental Quality Council (WQEC).

Please feel free to contact me at (307) 856-8136 with any questions.

Sincerely,

Steven F. Moldt, P.E.
2018-2019 President
Wyoming Solid Waste & Recycling Association
