

Shelleen Smith

I have been employed as the Director of External Affairs with Ramaco for seven years. In that time we have worked diligently to prepare a technically complete permit application for the Brook Mine. We have engaged in targeted outreach with community members, elected officials, stakeholders and many others. We have developed a long-term plan to create new markets for coal that will bring top-notch researchers and manufacturers to Wyoming. We have been a generous supporter of non-profits, museums, and community groups. We will continue to do all of this and more once our project is fully realized. On a personal note, my income has made it possible to purchase a home, send my kids to college, and serve as a city councilwoman. These are the kinds of opportunities I hope will be available for my family, friends and neighbors. I ask that you approve the Brook Mine permit application.
