

Michelle Butler

Please accept these as my official comments in support of the Brook Mine revised draft permit application. The opportunities for a positive economic impact to both Sheridan and the State of Wyoming are first and foremost the reasons for my support. Ramaco has been good stewards of the land and are sensitive to local concerns. They continue to be good neighbors and support our community and the state while providing our future generations economic opportunities that will largely impact the health of our state. I encourage you to approve the permit application put forth by Ramaco Carbon.
