

Cecil and Alma Gingerich

We oppose this permit because:

1. There is already a mine south of I-90
2. There is already a lot of traffic coming and going to the state park on roads that are not maintained by the state or the county as well as these roads are school bus routes.
3. What prevents run-off from going into the lake.
4. Dust and noise from the mining operation will contaminate adjoining properties as most people who live here moved here for the clean air and quiet.

There are many more reasons to oppose this application, but we feel the above points should be enough to deny the permit.

Thank you for listening and giving us a opportunity to comment.
