As residents of Bondurant, my husband Jim and I are very distressed to learn of the Evans company plan to increase the gravel mining operation and to include an asphalt plant and crusher facility on the property. In reading the application, it seems that there are quite a few possible inadequacies in their plan and preparation for a responsible management of the site. Traffic, dust, noise, light pollution, smells and other problems will arise, but the major problem is the proximity to the HOBACK RIVER, and the Dell Creek drainages which will go into the river. We have already seen the problems with other attempts at more commercial development near the river and hope that the decision will be made to deny the permit for increased development of the gravel mining operation. Thank you for your consideration of our concerns, sincerely, Jim and Christina Rizzo
