

Linda Cooper

The Bondueant location, the proximity to the Hoback River, the visual impact, the air quality effects from dust, and the inappropriateness of a mining operation adjacent to both the scenic view of the mountains and the road that emerges from the canyon climbing to the Rim is an abomination to the lanscape. All commercial operations in Bondurant or anyplace else need to take into account the existing conditions and the community. This abomination should not happen. Wrong thing. Wrong place. Wrong time.
