

Mike & Maissa Haden

We oppose the expansion of Evans Construction, Inc.'s existing gravel pit on Dell Creek Road. We are very opposed to a cement or asphalt batch plant at that location. The close proximity to Dell Creek and Jack Creek, as well as the Hoback River are all of concern. Dust from the gravel pit, and cement dust from a batch plant, as well as potential run-off, could very badly contaminate these waterways. The prevailing winds would drive the contaminants toward the waterways, as well as affect the air quality of the area. Property owners have purchased their homes and lived here, not anticipating it being an industrial area. Property values may be negatively affected. Dell Creek Road and the highway is already a dangerous intersection. Increased truck traffic at the intersection would increase the danger.
