

## Bruce and Susie Hibbs

Please do not let this happen on your watch. We live near Rush which is downriver from the hog farm. We are not in the section considered impaired yet the algae is unlike any we've seen before. Family members visiting for Labor Day couldn't take their little ones swimming. We have many out of state visitors who kayak on the Buffalo. They do this several times a year but said they'd never seen algae like this. Please do not let this hog farm keep operating.

Susan Hibbs
