

Jeff Cumpston

To Whom it may Concern,

I, my family, and many of my friends and acquaintances have enjoyed the Buffalo River for many years. The impact of the livestock industry on Arkansas watersheds is well-known. However, the Buffalo stands out as a special case. The ability to fish and swim in the river, without threat of the health concerns caused by nearby large commercial livestock operations, are integral to the experience of being there

It is my hope that ADEQ will fulfill its citizen-empowered mandate and act upon the scientific evidence to protect the health and well-being of the Buffalo River and the citizens of Arkansas (and beyond) that enjoy it.

Thank you.

Sincerely,

Jeffrey T Cumpston

Wesley, Arkansas
