Many comments have been made about how much financial benefit Newton County receives from the CAFO. The hog feed is not bought at the Jasper Feed Store, but outside the county. The hogs are sold outside the county. The county is out extra cost for maintaining the roads and bridges to the CAFO. The CAFO is family run so few outside jobs. The financing was done outside the county. It appears that Newton county gets little financial benefit from the CAFO and, in return, is left with the hog waste. Poor counties preyed upon on by large environmental insensitive corporations again.
