

Lucien Gillham

It's just a matter of time before a major rainstorm dumps 6 inches of water on the hog farm and it's sprinkler distribution area and causes a major pollution incident. Permitting this confined feeding operation up stream from the United States' first NATIONAL RIVER is a national embarrassment for the state of Arkansas. Look at North Carolina's mess after the recent hurricane. Don't give these polluters another inch. Shut it DOWN NOW.

Lucien R. Gillham Sr. Sherwood, Arkansas
