

Bill Pettit

I am writing in full support of your(ADEQ) denial of the hog factory Reg. 5 permit application. Sound science indicates this permit should be denied for several reasons, including the fact that this operation is located on karst terrain and that sections of BigCreek and the Buffalo River have recently been declared impaired due to high levels of pathogens and low dissolved oxygen. Plus when you consider that C&H's method of spraying the hog waste is illegal in North Carolina, it is obvious this permit should have been denied. Thank you, Bill Pettit, PO Box 15, Cotter, AR, 72626.
