

Taylor Bridges

I support the ADEQ denial of the C&H hog farm permit. Not allowing this denial is undermining the very reason ADEQ and other environmental regulatory authorities are put into place. In addition, allowing the continuation of such practices that significantly harm the health of our beloved waterway is denying the right of all Arkansans of clean waters. These rivers provide priceless experiences and are a part of a priceless ecosystem. The river's value is much greater than that of 6,000 hogs.

Please do right by your fellow Arkansans by doing right by The Buffalo River.
