Me and my family support C&H hog farms. I have lived n newton county my entire life. If anything has ruined that river it is the tourist, and the water sewer company on hwy 74 east 1/4 mile out side of jasper! Both of those families have done every thing by book! If you take this farm how many others will you take from families that have had their farms for generation after generations. Farming has been taught for many generations in Newton county. What about all those tree huggers that came into Boxley for their wood stock 2008 wen their were camping and taking bathes n the buffalo nobody was upset then. In my eyes nobody outside of Newton county should have an opinion. That farm has created jobs for people who don't have one, that's close to home for them. That family is amazing at what they do!
