

## Danny Smith

This river is too important to all of us in Arkansas and the US to allow this farm to operate and discharge waste into the watershed. The Buff is so beautiful and renowned that if tainted, the economic loss in the area would far exceed the economic gain from a hog farm. I haven't done the math personally but I'm sure someone has. There's no way that this hog farm is going to be as valuable as the preservation of the Buffalo River watershed.
