Arkansas Department of Environmental Quality  
ATTN: C & H Draft Denial  
5301 Northshore Drive  
North Little Rock, AR 72118-5317

To Whom It May Concern:

I am opposed to the draft denial of C & H Hog Farm's Regulation 5 Permit. The "deficiencies" used by ADEQ are nothing more than a ruse to intentionally withhold a permit from this farm family and an attempt to control those of us who live and work in Newton County.

ADEQ should only use sound scientific evidence from reputable and unbiased organizations and proven best management practices in its determination for issuance of a permit. ADEQ should not hold this farm to any higher standard than it has any other farms in this state. All waters of this state are important...one body of water is not more important than any other. If the design and management practices of other hog farms in the state are protective of the watersheds they are in, then C & H's farm should be held to the same, but not higher, standards as other farms.

Issue the permit.

Sincerely,

~~XXXXXXXXXX~~
