

John Hamilton

I am sending this email in support of the C&H Hog Farm & the Arkansas Family farmers that operate it

As a farmer myself, it terrifies me that an operation that has apparently bent over backwards the last few years complying with ADEQ's ever-changing rules & requests is still in a fight for its life from our state government. What's driving this attack on this farm? Sound science? Special interests? Big-money political donors?

Bottom line-ADEQ should be bending over backwards to HELP this operation succeed, not searching for reasons to shut them down. I'm extremely disappointed in the leadership of ADEQ & our Governor's office in this matter & the way this family has been treated.

Count me as a vote in support of the C&H Hog Farm continuing their operations for as long as they see fit to farm
