

How can the wolf in Wash. State not be endangered, WSFW has killed entire packs lately, If honest, there must be less than 120 wolves & not enough mating pairs,

Compare less than 120 wolves with thousands of cattle grazing on public land. Don't understand why WSFW protects a few ranchers and not the wolf population. Even the Governor agrees with the public.

Wolves are not moving toward recovery. Wolves don't stand a chance!
