

## Aaron Everett

I would like to see transparent plans, active management for the enhancement of the game herds that hunters have been paying for over decades before the Introduction of a new apex predator and a publicly accessible WDFW plan with monitoring and frequently updated results.

WDFW needs to be very clear on the goals, objectives and methods of attaining said G&O in the post-"recovery" plan. Personnel who enact the plan need to be clear on their own prejudices and desired outcomes and there needs to be strong monitoring to ensure that those prejudices do not warp policy and execution.
