

## Tina Meredith

Our wildlife and ecosystems need predators. WDFW should stop prioritizing cows over wildlife. We are in the middle of the 6th Mass extinction event, yet WDFW seems to not recognize the science. Stop catering to these ranchers who could care less about wildlife, ecosystems and the environment. We will not miss the cows if they disappeared off our public lands - they only make up 2% of the industry anyways - stop catering to them and prioritize our wildlife.
