Comments on Wolf Post recovery plan,

Dear Ms. Wood

This scoping process is to improve decisions to determine proposed actions, alternatives and impacts to be considered in a post recovery wolf plan. With WDFW's complete failure in mismanaging the imported elk herd into Skagit County, there is no credibility that WDFW could ever manage the imported wolves.

Before spending any tax dollars on any post recovery wolf plan WDFW must completely revamp and replace the WDFW management plan of wildlife to show WDFW even knows how to manage animals/wildlife.
